

Sprint 3 Retrospective

Overview

The purpose of this sprint retrospective is to evaluate what has been worked on and identify areas for improvement to achieve the team's goals for Release 2. The main objectives of Sprint 3 were to start building a functional backend and enhance the application's UI. Additionally, we focused on improving code quality through testing and documentation, which helped in bug detection and system maintenance. This retrospective will highlight key successes and areas for improvement as we move forward. Overall, Sprint 3 was successful in improving testing, documentation, and feature development.

Date	Monday, 24 February 2025
Team	Bulat-and-Friends
Participants	Marc-Yves Malchev - 40265238 Ryad Alla - 40227731 Joseph Aladas - 40156616 Alimurat Dinc Donmez - 40245310 Nektarios Zampetoulakis - 40211948 Azmi Abidi - 40248132 Bulat Abdullin - 40264963 Alessandro Tiseo - 40262416 Abdullah Taha - 40261146

Retrospective

Start Doing	Stop Doing	Keep Doing
Allow for peer reviews at the start of implementation.	Stop procrastinating on difficult issues.	Each meeting should have well-defined goals for each group member.
Create Unit tests based on the early implementation of the code.	Stop delaying code reviews. (Perform code reviews at a more efficient level.)	Keep testing the code for each commit.
Create short demos of the code produced and showcase it to the team.	Stop reinventing the wheel. (Use existing solutions)	Keep doing code reviews.
Start coding in pairs.	Stop working alone and seek collaboration.	Keep writing documentation.

Action Items

- 1 Improve the code review process by adding more reviewers and increase the speed of adding reviews.
- 2 Indoor Navigation Between SGW and Loyola campuses, providing the shortest path.
- 3 Incorporate Multi-Floor Navigation with the different Campuses.
- 4 Acquire the course and classroom schedule from students.
- 5 Generate directions to the next class.
